Use this form when researching passenger arrival information (often called Passenger Lists or Passenger Manifests). Although the amount and types of data will vary from year to year, this form should help you capture most of the basic information containing possible clues for your genealogy research. This sheet can hold information for 20 individual arrivals (lettered A through T at left) and information on a passenger recorded in line A in the top section can be continued in the corresponding line for the bottom section. Where possible, you should record the page and line number from the original document so that you or another researcher can easily refer to the original source in the future.
